SOFTWARE RELEASE DOCUMENT (SOFTDOC)

Product:	HPE Shadowbase Enterprise Manager
Release:	Gravic Version: 6.320 HPE NonStop Shadowbase: T1122H06-AAG (SB Repl/Guardian)
Release Date:	March 15, 2017
Copyright Notice:	Copyright Gravic, Inc. 1995 – 2017 (www.gravic.com)
File Name:	IPM6320-SEM.pdf

NOTE: This release contains updated software for HPE Shadowbase Enterprise Manager, a Microsoft Windows based application for monitoring and managing Shadowbase replication environments.

NOTE: This softdoc applies to the HPE Shadowbase Enterprise Manager component of T1122H06. Other softdocs document the releases of the other components in T1122H06, including:

- HPE Shadowbase Audit Reader,
- HPE Shadowbase Compare for SQL,
- HPE NonStop Shadowbase Guardian replication, and
- HPE NonStop Shadowbase OSS replication.
- HPE Shadowbase for Other Servers.

You are advised to reference those other softdocs for the changes related to those specific components.

Special Notes for Version 6.320

1) The SEM help subsystem requires a web browser that supports HTML 5. If you have issues displaying help, please upgrade to the latest version of your browser. Help is supported by Mozilla Firefox version 4 or later, Google Chrome version 9 or later, and Internet Explorer 9 or later.

Changes in Release 6.320

This section summarize the new features and problems fixed since the last General Availability release, Gravic version 6.230.

New Features in Release 6.320

Release 6.320 does not contain any new features for SEM.

Problems Fixed in Release 6.320

1) Objects monitored by SEM can be configured to blink when there is a lack of activity over a configured interval. Once triggered, the blinking could not be stopped either with the Stop All Blinking button or individually. This has been corrected, the blinking can be stopped by command.

2) "Display Object Type" could not be de-selected (inhibited) in the SEM monitor preferences. This issue has been fixed.

3) SEM could crash in the Script Preferences window in certain circumstances. This issue has been fixed.

4) SEM abended in monitor mode with an error 9000 if the monitor preferences window was not opened first. This issue has been fixed.

Installation Instructions

SEM is provided with a standard Windows installer. Unzip the downloaded file, change directory to the SEM installation directory, and run setup.exe. The installer will take you through the remaining installation tasks.

Known Problems Remaining

1) The listener for Shadowbase Other Server environments will not properly connect if it is named using a one-character object name.
