

# HPE and Gravic

HPE NonStop systems and HPE Shadowbase

## A new style of partnering

Hewlett Packard Enterprise and Gravic are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, Gravic is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Gravic has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

**Working together. Accelerating results.**

## Product overviews

**HPE Shadowbase** software is a full-featured solution suite that provides Business Continuity, Data Integration, Application Integration, Data Validation, and Data Recovery for Cybersecurity:

- **Business Continuity** solutions enable sophisticated architectures for continuous application availability with automatic failover detection and recovery for extreme application uptime and service resilience.
- **Data Integration** enables data streaming between different platforms and databases to eliminate data silos and enable enterprise-wide data sharing.
- **Application Integration** streams data between different applications for event-driven architectures including real-time fraud detection and real-time business intelligence and analytics.
- **Data Validation** compares and fixes data so it is consistent and accurate across different systems to ensure data integrity and Business Continuity.
- **Data Recovery for Cybersecurity** provides digital resilience capabilities to address the growing threats of malware and ransomware by isolating and protecting mission-critical data with data recovery after a cyberattack.

- **Essentials** bundle provides valuable data management tools to enable auditing, data transformation and cleansing, data loading, and restoration of corrupted databases.

**HPE NonStop:** For business that never stops, HPE NonStop was designed from day one with built-in clustering and workload balancing to enable withstanding single points of failure, so applications continue as if no failure occurred. That means no disruption of work, no impact on customers, and no degradation in performance. For almost four decades, the HPE NonStop architecture remains the ideal choice when there is a need for reliable uninterrupted availability — in compute environments that serve mission-critical businesses.

HPE NonStop scales up to 16 HPE NonStop CPUs and 6 cores per CPU within a single node, each running its own copy of the HPE NonStop OS, and scales out to 4080 HPE NonStop CPUs on 255 networked nodes or 24,480 cores.

HPE NonStop comes with a built-in transactions management framework that helps ensure full data integrity. Support for modern languages, interfaces, and Eclipse-based environments makes applications development faster, easier, and more efficient. HPE NonStop also comes with modern security algorithms and encryption technologies.

## Company overviews

### About Gravic

Gravic, Inc. is a privately held company located in Malvern, Pennsylvania, USA. Gravic develops a range of computer software solutions for change data capture, data collection, transformation, validation, and distribution purposes. The Shadowbase line of software includes solutions for business continuity, data integration for real-time data synchronization, application integration for real-time business intelligence, and a number of additional utilities and tools, creating a complete solution for our customers.

Gravic led the market in providing data replication and data integration software solutions ever since the release of TMF-Auditor, the first online replication product of its kind, in 1984. Today, Gravic continues to push the technological evolution of database replication solutions with its patented flagship Shadowbase line of transactional replication software products. Gravic strives to provide complete replication solutions to our customers by providing expert professional services and support when required.

Customers of Shadowbase Data Replication and Data Integration products include banks, financial and brokerage firms, insurance companies, stock exchanges, electric utilities, healthcare businesses, telecommunication companies, and government agencies. HPE directly sells and supports Shadowbase Business Continuity, Data Integration, and Application Integration solutions under the name HPE Shadowbase. For more information, contact your local HPE sales representative, regional reseller, or visit [ShadowbaseSoftware.com](https://ShadowbaseSoftware.com).

## About HPE

HPE is the edge-to-cloud company that helps organizations accelerate outcomes by unlocking value from all of their data, everywhere. Built on decades of reimagining the future and innovating to advance the way people live and work, HPE delivers unique, open, and intelligent technology solutions, with a consistent experience across all clouds and edges, to help customers develop new business models, engage in new ways, and increase operational performance.
